enquire about this range

The Force cubicle range combines durability, design flexibility, and bold visual appeal in one high-performance system.

Crafted from high-performance Compact Grade Laminate and available in over 50 striking colour combinations, Force offers the freedom to create bold, customised washroom environments across both toilet and shower areas. Its bolt-through, heavy-duty Satin Anodised Aluminium (SAA) ironmongery ensures long-term durability, even in the most demanding, high traffic settings.

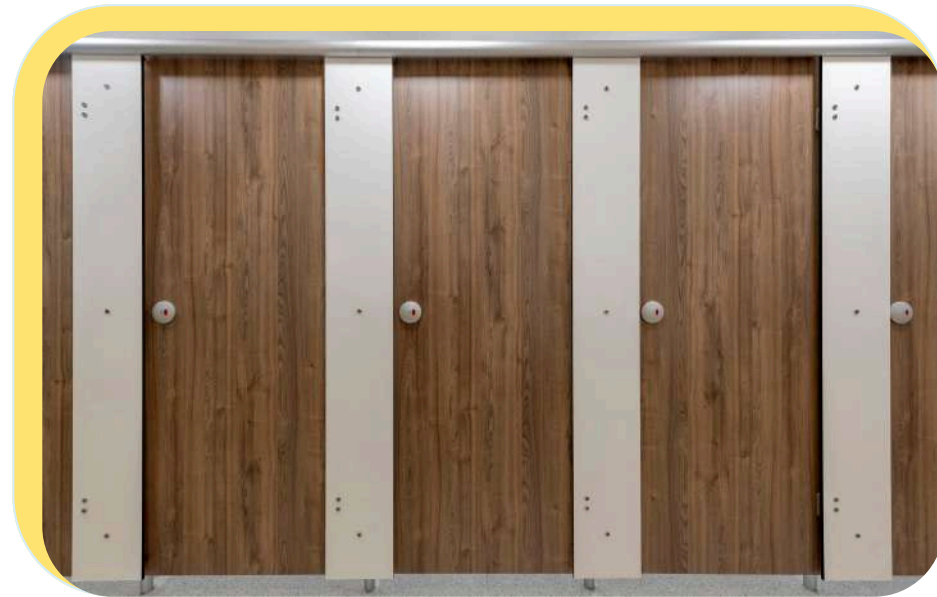

Suitable for key stages 1,2,3 and above, Force is built to endure whilst providing the creative freedom to achieve standout washroom design.

CGL Panel Material

Force cubicles are fabricated from 12mm Compact Grade Laminate (CGL).

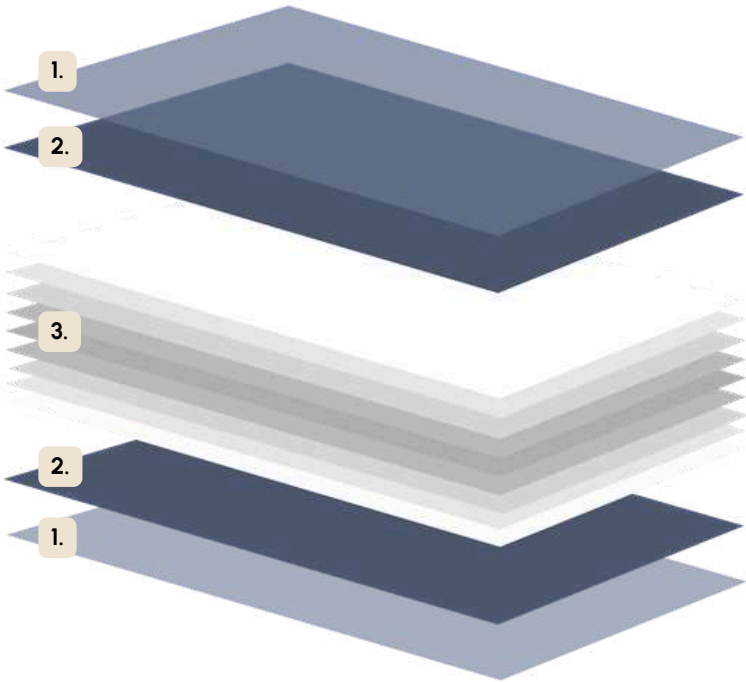

Also known as Solid Grade Laminate (SGL), this material offers excellent performance in high-traffic environments, with strong resistance to impact, moisture, and persistent daily use.

Designed with longevity and style in mind, Force both brightens and can withstand the most demanding washroom environments, making it ideal for education washrooms with heavy student footfall.

Compact Grade Laminate

Compact Grade Laminate is made from multiple layers of kraft paper, impregnated with resin, then compressed under high pressure into a solid black core, ideal for areas where high traffic and wet areas are present.

CGL Key

- 1. Melamine Overlay
- 2. Décor Paper
- 3. Kraft Paper (Approx. 50 layers)

Force Cubicle Colour Range by Fundermax

Fundermax compact grade laminates used in our Force cubicles feature a fine eggshell finish with a smooth, tactile feel that enhances its appearance.

Bespoke Ironmongery Finishes

For large-scale washroom projects featuring 20 cubicles or more, we offer the option to powder coat hardware to match any RAL colour.

This allows for greater design flexibility and to create a cohesive, custom finish that aligns perfectly with the wider interior scheme or brand palette.

Elevating everyday spaces.

We're here to help. Speak to our specification team for project guidance, technical requirements, and expert insight on our products and how they fit into your next design.
