enquire about this range

The Force cubicle range combines durability, design flexibility, and bold visual appeal in one high-performance system.

Crafted from high-performance Compact Grade Laminate and available in a variety of striking colour combinations, Force offers specifiers the freedom to create washroom environments across both toilet and shower applications. Its bolt-through, heavy-duty Satin Anodised Aluminium (SAA) ironmongery ensures long-term durability, even in the most demanding, high-traffic settings.

From hospitals and clinics to GP surgeries and care facilities, our Force cubicle system combines strength, hygiene, and long-term performance where it matters most.

CGL Panel Material

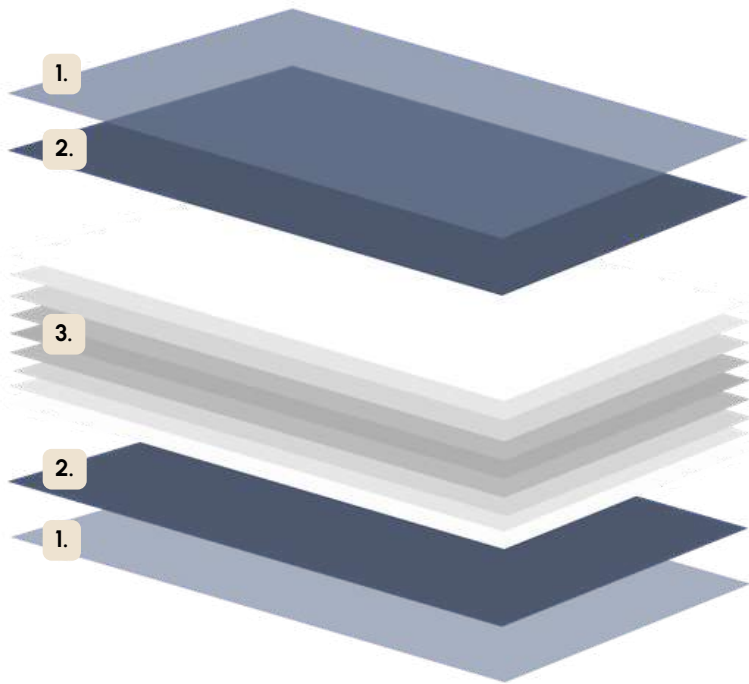

Force cubicles are fabricated from 12mm Compact Grade Laminate (CGL).

Designed with longevity and style in mind, the Force range both brightens and withstands the most demanding healthcare washroom environments.

CGL is a robust material that is impermeable to moisture and easy to clean, equipping the Force Privacy system for the demanding conditions of clinical washrooms, while still delivering a smart appearance.

Compact Grade Laminate

Compact Grade Laminate (CGL) is made from multiple layers of kraft paper, impregnated with resin, then compressed under high pressure into a solid black core, ideal for washrooms with high traffic and wet conditions.

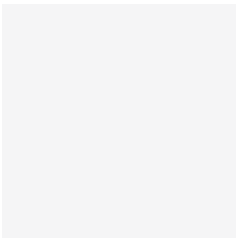

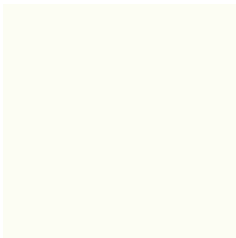

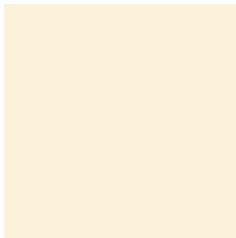

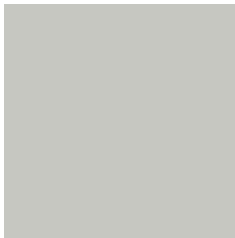

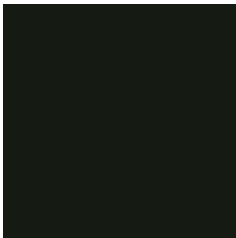

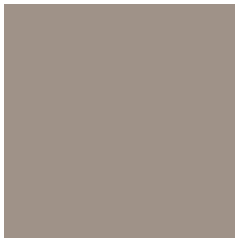

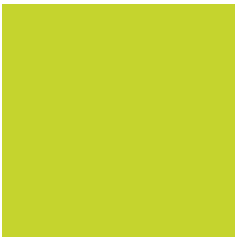

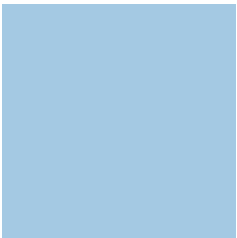

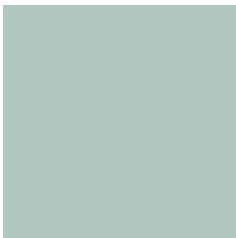

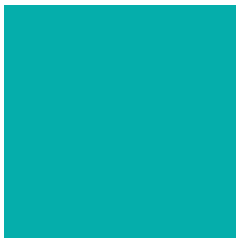

CGL Key

- 1. Melamine Overlay
- 2. Décor Paper
- 3. Kraft Paper (Approx. 50 layers)

CGL Colour Range by Fundermax

Fundermax compact grade laminates used in our Force cubicles feature a fine eggshell finish with a smooth, tactile feel that enhances its appearance in clinical settings.

Bespoke Ironmongery Finishes

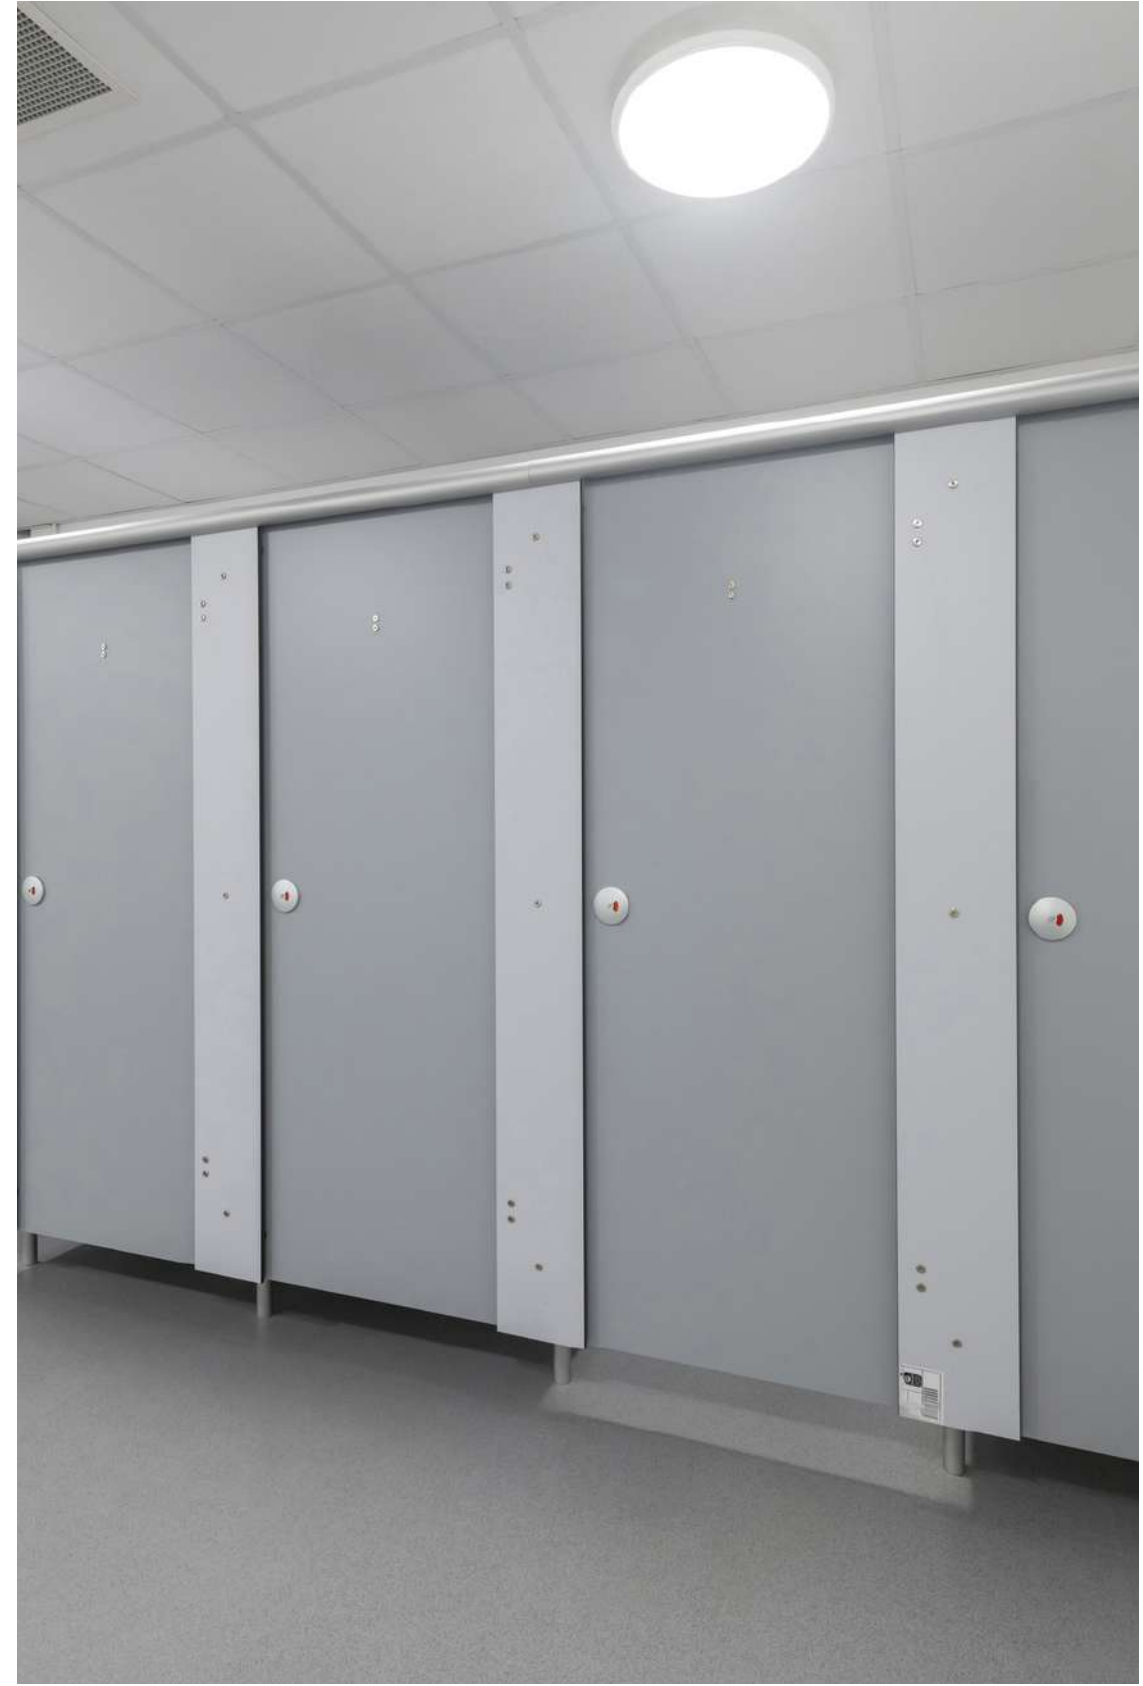

For large-scale washroom projects featuring 20 cubicles or more, we offer the option to powder coat hardware to match any RAL colour.

This allows for greater design flexibility and to create a cohesive, custom finish that aligns perfectly with the wider interior scheme or brand palette.
